## **Radiant Ceiling Heat Addendum**

The following condition is hereby incorporated into the month-to-month residential rental agreement or lease agreement dated	
Owner(s)	:
Tenant(s) understand they are <b>NOT</b> to install any hooks, nails, or other penetrating devices in the ceiling of the above referenced property due to the heat coils in the ceiling for the electric radiant heat system.  Some portions of ceilings in some older buildings may also contain asbestos which <b>MUST NOT</b> be disturbed as it can pose a very serious health risk if not handled properly. Do <b>NOT</b> attempt to install anything that will penetrate the ceiling on your own. If you are interested in possibly installing such penetrations, you <b>MUST</b> contact the management office in advance and (if this can be done safely) we will handle the installation at no cost to you and we will take all necessary precautions.
